Please join the Monterey Bay Psychological Association and Santa Cruz CAMFT for a Unique Workshop which Challenges Conventional Wisdom. This unique six hour course will help therapists:

- Navigate the complex and murky water of dual relationships and boundary crossings in small communities.
- Differentiate between harmful/exploitative and helpful/enhancing dual relationships.
- Deal with boundary crossings such as touch, gifts, bartering, non-sexual touch, home visits, and “out of office” accidental encounters.
- Maximize clinical effectiveness when entering into non-sexual and non-exploitative dual relationships.
- Make better decisions as to how to care for your clients and protect yourselves.
- Devise a risk management plan for dual relationships.

Living in a small community such as the Bay Area, it is more than likely that you will run into a client at the supermarket, a professional organization gathering or even in the shower at the gym. Dual relationship and boundary crossing have been used synonymously with exploitation, sexual relationship and harm. Unlike the prevalent myth that ALL dual relationships are unethical and illegal, the reality is that there is no longer a uniform ban on all dual relationships. The 2002 newly revised APA Code of Ethics clearly states: “Multiple relationships that would not reasonably be expected to cause impairment or risk exploitation or harm are not unethical.” The California Association of Marriage and Family Therapists (CAMFT) agrees.

Even though there is no prohibition against non-sexual or non-exploitative dual relationships, most therapists and attorneys erroneously believe there is. As a result, fear and trepidation reign and many therapists either practice dual relationship in secret or avoid it all together even when it can promote healing. The complete and uncritical avoidance of all dual relationships and boundary crossings may result, in some cases, in poor clinical judgment and inferior treatment.

The course will provide a balanced and non-dogmatic view of dual relationships and also opposing views on this charged topic as well as helping therapists realize how dual relationships and boundary crossings may fit with their theoretical orientation, no matter what it may be.

Basic Charge for program will be:
- For CEU’s add $7.00 for a total of $132.00 or $147.00.
